

The "DogShow Pro - Standard" edition provides at least the following functionality, please don't hesitate to contact us with any questions or special requirements you may have.

- Permissions per user in order to restrict access appropriately and avoid mistakes by ring stewards, secretaries etc.
- Import of CSV files from the web platform "app.dogshow.pro" which seriously accelerates the procedure of processing and approving the show entries.
- The club is able to easily process and check all entries before proceeding to print the show catalogs. The software offers many automatic checks to avoid mistakes (e.g. check dog age VS class registered).
- Multi-day shows or multiple shows during same day are fully supported.
- Entries statistics are available in order to calculate the amount of CAC/CACIB certificates needed for the show.
- Automatically calculates the charges for entries according to the pricing policy set by the club.

**Attention:** Current pricing policy scheme must be like the following example, if you have different requirements we can discuss it.

Pricing policy example:

1st	Dog	–	28	Euro
2nd	Dog	-	19	Euro
3rd	Dog	-	11	Euro
Puppies - 10 Euro				

To further assist the finance process, the software provides detailed financial reports from which you can easily determine if there are any pending payments or over payments.

- Define and print/export Rings schedule per judge/ ring / breed
- Print show catalogs and/or export to PDF for all classes including Kennels, Brace, Progeny etc. Advertisements, guidelines or other information that the club may want to include in show catalog must be prepared in other software.
- Special show catalog report for ring stewards which only includes the dogs judged in a specific ring, sorted by judging order. It also includes special boxes to check for options like CAC / CACIB / BOB / BOS etc.

- Show catalogs for mobile phones automatically generated and hosted on our cloud platform
- Judge's name is printed in dog evaluation
- Evaluations module which includes smart checks to avoid errors like giving 2 BOB awards to same breed or "require excellent to allow CAC" etc.
- Printing evaluations based on the evaluation form provided by the club. It's possible to print a single evaluation or mass printing based on criteria like "print Bulldogs" and/or "print Group 5".
- Entries can be added/modified even during show day.
- If the software is operated in offline mode, when rings are completed the show organizers collect the results from the rings in order to perform the show finals.
- There is the option to print CAC/CACIB certificates according to the sample provided by the club and on the paper/form provided by the country's kennel club or breed club.
- For show finals, groups, junior, puppy etc. in order to facilitate the procedure, the software shows lists of the dogs that are allowed to participate in show finals. (e.g. automatically lists the dogs that earned BOB)
- For large categories like "Best Junior" there is special shortlisting functionality in order make it easier to handle.
- After the completion of groups 1-10 the dogs entitled to participate in "Best in Show are automatically listed by the system.
- All results and evaluations are stored in the local database, thus it's easier for the club to check its results and make any corrections that might be required.
- Various reports to check results (e.g. Results per breed, Dogs who won BOB, CAC etc.)
- If the results need to be sent to the country's kennel club, there is the option to export show results to various file formats, TXT, EXCEL etc.
- The system comes pre-configured with breeds, colors, breeds judged by color etc. as FCI has defined the standards.
- Any functionality can be modified and customized according to your club's requirements.
- The software can be installed in any computer with Windows 7 or later.
- Without any modification the software supports client/server infrastructure if the club has a server. It also supports offline mode which allows the use of software without any server simply using any computer/laptop in the rings.

- For a successful organization it is important that all installations, preparations and user training for the club users that will process the show entries and catalogs take place about 15 days before the show.
- Especially for the ring secretaries the training required doesn't exceed 5 minutes.

Thank you for considering DogShow Pro for your club.
